| Versión larga parte 1                                                     | Muscle strain, unexpected jolts, and dust inhalation are just some of the hazards you face when drilling in concrete. Fortunately, we've developed the GBH 18V-22 Professional rotary hammer to make your job more comfortable. This tool is compact, light, and ergonomically designed with a well-defined centre of gravity, so you will find it easier and less tiring to handle it, especially when drilling overhead. You stay in control and there's less impact on your hands and arms thanks to KickBack Control and Vibration Control. Connect the hammer to the GDE 18V-12 Professional dust extractor with just one click for a cleaner site while you work. And you can wrap up the job with less interruptions too – this tool combines high performance with efficient battery runtime. |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| Versión larga parte 2                                                     | The GBH 18V-22 Professional rotary hammer is your tool of choice if you want a powerful but manageable power tool. It is ideal for drilling 6 mm to 10 mm holes, whether you are a plumber putting in sanitary installations or a carpenter prepping a site for a kitchen installation. Equally, if you are an electrician, you can count on this tool, particularly when drilling overhead to install lighting, lamps, and smoke detectors. The GDE 18V-12 Professional dust extractor is specially designed to facilitate overhead work. Compatible with the Bosch Professional 18V System and with the multi-brand battery alliance AMPShare.                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| Información adicional versión corta                                       | This tool is packed with power and features, elevating the drilling experience to a next level, with extra efficiency, safety and control. More holes are drilled per fully charged battery and stable power output delivered by its potent Bosch 18V brushless motor combined with constant speed. Includes enhanced safety against accidental jams and reduced vibration exposure due to KickBack Control and Vibration Control, respectively. It also contributes to a dust-free work condition through its attachable Auto Power GDE 12 Professional extractor.                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| Versión larga parte 1 (BE)                                                | El GBH 185-LI está equipado con potencia y funciones para elevar la experiencia de perforar a otro nivel, con más eficiencia, seguridad y control. Permite realizar más perforaciones por cada carga completa de la batería y por la potencia estable que entrega el motor Brushless sin escobillas de carbón de 18 V de Bosch combinado con Constant Speed. Incluye seguridad mejorada frente a atascos accidentales y menor exposición a la vibración gracias a las funciones KickBack Control y Vibration Control, respectivamente. También contribuye a un ambiente de trabajo sin polvo gracias al extractor acoplable Auto Power GDE 12.                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

### Beneficios del producto

- Better drilling experience due to Vibration Control, designed to absorb pulsation
- Dust-free work condition with Auto Power GDE 12 Professional extractor attachment
- Enhanced safety against accidental jams thanks to KickBack Control
- More holes per charge and continuous power output thanks to motor with constant speed
